

# **SOUTHERN HYDROCARBON CORP.**

GEL STICKS FOR WATER, OIL, AND CONDENSATE REMOVAL FROM GAS WELLS

## **PRODUCT DESCRIPTION HF24**

The HF24 gel stick is a gel/paste center gestic blend of surfactants and foam stabilizers. Available in water soluble extruded polymer tubes or dissolvable paper tube.

## **PRODUCT BENEFITS**

Soluble polymer tube allows for deeper penetration into fluid column. Light agitation accelerates maximum action. It's formulated to perform in both low and high salinity well fluids, very effective in the presence of hydrocarbons, offers water surface tension reduction aiding in disposal injection, and reduces emulsions in surface vessels. Field proven to be effective in most all well conditions.

## **APPLICATION**

Remove plastic bag, inject entire stick down the tubing. Due to the high volume of foam produced it may be necessary to shut in well to build sufficient pressure to unload foamed well fluids.

## **SHIPPING AVAILABILITY**

Sizes 1 1/4" X 15", 1 1/4" X 10", and 3/4" X 15" are available. Shipped in 100 count cases.

## **TYPICAL PHYSICAL PROPERTIES**

Ph..... 6.5-9.5  
Odor..... Typical  
Solubility..... Water soluble/Oil dispersible  
Appearance..... Tan
